

BUILDING CONNECTION

**THE INDUSTRY GUIDE FOR BUILDING
AND RENOVATION PROFESSIONALS**

ABOUT BUILDING CONNECTION

For 30 years, *Building Connection* has been the primary source of independent industry information for Australia's building market – worth more than \$60 billion per annum.

Primarily targeting the micro-builder (1 – 10 staff), *Building Connection* provides the market with independent, well-researched technical advice, through an investment in our own researchers/editors and the support of experts columnists.

Our readers businesses focus on the booming renovation/new build and repair sectors and as small businesses, these industry professionals are normally difficult to communicate with and influence. *Building Connection* provides direct access to the business owner and decision makers, putting your message in front of this important sector of the building industry.

We are unique in that we promote the passing down of 'tribal knowledge', the wise old-man-way of doing things that is in danger of being lost to time.

ONLINE

The www.buildingconnection.com.au website is a valuable vehicle for communication between the print editions of *Building Connection*, to keep the industry up to date.

E-NEWSLETTER (NIB)

The biweekly e-Newsletters are a newsfeed featuring all recent press and product releases delivered to industry inboxes in Australia and New Zealand.

See page 8 for more details on our exciting new service.

INDUSTRY RELATIONSHIPS

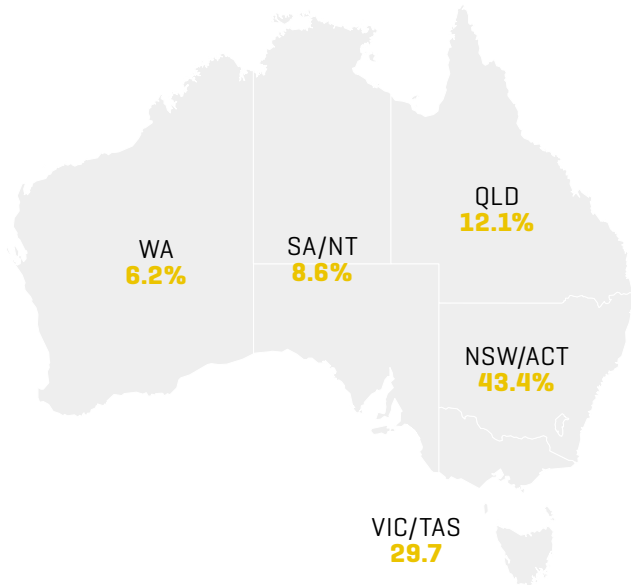

We remain independent of any industry association but work with them and their members on various stories, as appropriate.

In order to develop our story content and technical articles, we consult closely with many industry groups and their individual members. We greatly value these ongoing relationships and in turn offer these organisations access to disseminating important messages to the broader market.

MAGAZINE

Building Connection maintains its position as the leading independent trade publication for the professional building industry. For 30 years, the magazine has been the primary source of technical content for the industry – developing targeted content to help industry grow, to educate the building industry professional, and to interpret the changing regulatory and technological environment.
